

## FREDDY'S FROZEN CUSTARD AND STEAKBURGERS

GROUND UP CONSTRUCTION | OWASSO & BROKEN ARROW, OK

Ink Construction recently completed two Freddy's Frozen Custard and Steakburgers in the Tulsa, Oklahoma area. There are several advantages to building multiple units in the same area such as consistency in craftsmen and material costs, and familiarity of area codes and requirements.

Freddy's prides itself on being a unique dining experience and utilizes exterior brand elements including the signature custard cone and logo signage on the front parapet wall, striped awnings, descriptive side signage, and "Freddy's Red" to consistently reinforce the brand experience.

Inside, Freddy's have a specific flow with an ordering station, pick-up station and self-serve drink station that moves guests through the process naturally and into the dining area. Because Freddy's is made fresh, back-of-house features dual cooklines, one for drive-thru and one for dine-in customers. The dual cooklines are essential to maximizing customer service during peak times. And just like Freddy's, Ink delivers a quality customer experience throughout the building process with a focus on quality, open communication, and integrity.
